## Submission of articles, books for review, and book reviews

The editors invite submission of material for publication. It is suggested that prospective authors contact the Editor-in-Chief Eric Y. Drogin, 350 Lincoln St., Suite 2400, Hingham, MA 02043-1579; phone: 877-877-6692; email: edrogin@bidmc.harvard.edu. Current editorial policy requires that lead author(s) of any article must be an attorney or a psychiatrist.

Please direct books for review to Daniel P. Greenfield, M.D., M.P.H., M.S., 24 Lackawana Plaza, Milburn, NJ 07041; e-mail: dpgfldmd@msn.com.

Experience has demonstrated that adherence to the following guidelines will minimize inconvenience to our contributors as they prepare their manuscripts.

### A. BEFORE YOU START:

Please submit articles electronically at the address above or use white 8-1/2" x 11" white typewriter/printer paper.

Please type manuscripts in 12 point type, **double-spaced throughout, including endnotes, quoted material, and references.**

All **notes** should be **AT THE END OF THE ARTICLE**, and also **double-spaced**.

Allow ample margins (1"+) on all sides so that editorial queries or comments may be added where appropriate.

### B. CONSIDERATIONS FOR STYLE:

Any quoted material must be accompanied by an endnote citation giving the exact page where it may be found. In **book reviews**, quoted material may be followed by a page number in parentheses or be cited in an endnote.

With respect to notes, only the most pertinent references and citations should be noted (i.e. do not thank secretaries and typists). Notes should appear **AT THE END OF THE ARTICLE** and should be numbered consecutively and **DOUBLE-SPACED**. For proper citations or stylistic decisions, please follow the style outlined in the APA style book. Notes should be in the same size type as text (minimum size 12 point)

Use brief subheads to break up long articles.

Since the JOURNAL is a forum for the interdisciplinary study of the law, the use of professional jargon or technical terms should be limited and, where used, explicitly defined.

Graphs, tables and charts should be numbered consecutively and each such illustration must be prepared on separate pages. Submit clean, original drawings in black & white "camera-ready" condition (no copies will be accepted).

It is the editors' intent to have your article copyedited, but the responsibility for the correctness of quotations and citations rests with you, the author.

### C. ARTICLE LENGTH:

The editors are quite flexible about the length of an article. In almost all cases, this should be discussed with the editors if you are unsure.

### D. SUBMISSION OF ARTICLES, DEADLINES, PUBLICATION:

Manuscripts not solicited by a specific editor should be submitted to the Editor-in-Chief Eric Y. Drogin, 350 Lincoln St., Suite 2400, Hingham, MA 02043-1579; phone: 877-877-6692; e-mail: edrogin@bidmc.harvard.edu. Since all articles received are reviewed by a number of people, we can assume no responsibility for the return of rejected material. Every article that is submitted will be reviewed, however, and a decision will be communicated to the author as promptly as possible.

JOURNAL OF PSYCHIATRY & LAW is published four times each year, in the spring, summer, fall and winter. Articles may be submitted at any time, but it should be noted that publishing commitments are made a number of months ahead of publication of any particular issue. Authors whose articles have been *accepted* for publication must submit final copy reflecting any necessary corrections and ready for the printer at least two months prior to publication. In all cases, the editors will provide you with the appropriate deadline.

In no case (unless previously agreed to by the editor) will corrections be made in galleys. We cannot stress strongly enough the importance of submitting final manuscript copy in *final* form.

Each author of an article or book review will receive one (1) copy of the issue in which his/her article appears and fifty (50) reprints of his/her article. In the case of multiple authorships, the fifty (50) reprints will be distributed among the authors as they wish.

Each author must provide, at the time he submits his manuscript, a complete mailing address so that the copyedited manuscript and, eventually, reprints can be sent to him as soon as available. **Please include home, office (or cell) phone telephone numbers and e-mail address.**

Articles accepted for publication will be copyrighted by the Publisher and the Publisher will have the exclusive right to publish, license and allow others to license the article in all languages and in all media; however, authors of articles will have the right, upon written consent of the Publisher, to free use of their material in books or collections of readings authored by themselves. Except for such arrangements, it is understood that you will not receive any remuneration for any article submitted to or accepted by the JOURNAL OF PSYCHIATRY & LAW.

Manuscripts are received with the explicit understanding that they are not simultaneously under consideration by any other publication. ***The JOURNAL will not review articles for possible publication if the article is presently being reviewed elsewhere.***

All articles should be prefaced by a synopsis of not more than 100 words. It should be a factual (not descriptive) summary.

A short (50-100 word) professional biographical sketch of yourself should be submitted on a separate sheet of paper, including a bibliography of significant articles published by you.

## Notes on contributors

**EILEEN B. BISGARD, J.D.** is the Project Director of the Seventeenth Judicial District FASD Project. Eileen has worked in the child welfare field, primarily as a Guardian ad litem representing the best interest of abused and neglected children, for over thirty years. She taught the Child Advocacy Clinical Program at the University of Denver Law School for six years and has done training in the area of FASD throughout Colorado and at National Conferences. She is the adoptive parent of two children affected by FASD.

**SUZETTE FISHER, S.N.D., M.E.D., ED.S.** led the development and field-testing of FAS curricula for parents and teachers under the sponsorship of the Centers for Disease Control and Prevention (CDC). From 2004-2007, she served as Project Director for Project Adapt, a collaborative initiative to identify and serve youth in the Lucas County Youth Treatment Center, residential placement for 12-17 year-old juvenile felony offenders who have FAS. Nationally known in the field of FASD, Sr. Suzette Fisher gives presentations at local, state and national level conferences. She serves on the Board of Directors of the National Organization for Fetal Alcohol Syndrome (NOFAS). She provides education, intervention, and advocacy services for children with FASD in school, judicial and social service settings. Prior to Double ARC she served in education for over twenty years as teacher and principal in schools in Ohio, Illinois and Indiana.

**SUSAN ADUBATO, PH.D.** is a New Jersey licensed psychologist. She presently is Director for the Northern New Jersey FAS Diagnostic Center located in Newark, NJ, on the campus of UMDNJ-New Jersey Medical School. She also serves as Director for the NJ/NE FASD Education and Research Center also located in Newark, NJ. Dr. Adubato has presented workshops around the United States and Puerto Rico on prenatal alcohol and FASD. In addition, along with her co-editor Dr. Deborah Cohen, she is presently completing the first e-book on FASD to be published in 2011.

**MEGHAN LOUIS** has her BA degree in Criminal Justice from the University of Wisconsin-Eau Claire and is working on her Master's in Public Safety Administration at St. Mary's University. She is the project director of the FASD program in Hennepin County, Minnesota. Before assuming this position Ms. Louis was a social worker within Hennepin County Juvenile Probation where she worked directly with youth in the criminal justice system who had been diagnosed with FAS. Ms. Louis works closely with the Minnesota Organization on Fetal Alcohol Syndrome on legislative policies and on supports offered to families throughout the state. She has made presentations on the topic of youth with FASD and the juvenile justice system at many residential treatment facilities and conferences, including the Minnesota Association of County Probation Officers, the Juvenile Detention Association, the Minnesota Public Defenders Dispositional Advisors, the Correction Education Association and Building FASD State Systems.

**FRED BOOKSTEIN, PH.D.** (1977) in statistics and zoology, is professor of statistics at the University of Washington, Seattle, and professor at the University of Vienna, Austria. His main research interests, beyond a long-standing concern for alcohol-related brain damage and its behavioral consequences, center on fundamental questions of statistics and measurement in a variety of scientific contexts, including human evolution, human growth, and human chronic diseases. His latest two books are *Virtual Anthropology*, with Gerhard W. Weber, being published by Springer Verlag early 2011, and *Numbers and Reasons: Numerical Inference in the Sciences*, a review of the last century's developments in quantitative science, to be published in 2012. **ARTHUR P. KOWELL, M.D., PH.D.** is a board-certified neurologist and clinical neurophysiologist. He received his M.D. and Ph.D. in anatomy from the University of Pennsylvania. Dr. Kowell completed a medical internship and neurology residency at UCLA Medical Center. He is currently a Clinical Professor of Neurology at the David Geffen School of Medicine at UCLA, and a partner in Encino Neurological Medical Group, Encino, California. His specialties include brain injury, FASD, clinical neurophysiology, and neurobehavioral problems, particularly violent and aggressive behavior.

**NATALIE NOVICK BROWN, PH.D.** is a psychologist and founding Program Director of FASD Experts. After completing a postdoctoral fellowship in FASD under Dr. Ann Streissguth at the University of Washington in 1995, her clinical and forensic practice has specialized in FASD. She is a clinical assistant professor in the Department of Psychiatry and Behavioral Sciences at the University of Washington, where she consults with the Fetal Alcohol and Drug Unit. **ANTHONY P. (TONY) WARTNIK** served as a trial judge for 34 years, almost 25 years on the Superior Court in Seattle, retiring as the senior judge. He served as Dean Emeritus of the Washington Judicial College, chaired the Judicial College Board of Trustees, and the Washington Supreme Court's Education Committee. Judge Wartnik chaired a task force to establish protocols for determining competency of youth with organic brain damage and the Governor's Advisory Panel on FAS/FAE. He is the Legal Director for FASD experts and a consultant to the Fetal Alcohol and Drug Unit (FADU) at the University of Washington, School of Medicine. **PAUL CONNOR, PH.D.** is a licensed psychologist and neuropsychologist. He received his doctoral training at Brigham Young University and served as the neuropsychologist for the Fetal Alcohol and Drug Unit (FADU) at the University of Washington in the Department of Psychiatry and Behavioral Sciences. For nearly 13 years, while at FADU, he conducted research on the impact of prenatal alcohol exposure on neuropsychology, mental health, and brain structure and function. He is the neuropsychology director of FASD Experts. **RICHARD S. ADLER, M. D.** is a board-certified adult, child and adolescent psychiatrist. Since 2007, Dr. Adler has been the founding Medical Director

*of FASD Experts. He completed a forensic psychiatry fellowship at the University of Washington and is a clinical instructor in the Department of Psychiatry and Behavioral Sciences.*

**LARRY BURD, PH.D.** is a Professor in the Department of Pediatrics at the University of North Dakota School of Medicine. He is the Co-Principal Investigator for the TIC Consortium and The Early Program (Screening for autism in young children). For over 30 years Dr. Burd has been with the children's program at Altru Health System and Director of the North Dakota Fetal Alcohol Syndrome Center. Dr. Burd has evaluated and developed intervention programs for over 15,000 children with developmental disorders. He has published over 120 professional papers on topics dealing with development and behavior in children and adolescents. He has several handbooks for parents and teachers of children with mental health disorders. Dr. Burd is currently a co-PI of the PASS Network which examines maternal and environmental risk factors for stillbirth, infant mortality including SIDS and FASD. **DIANE FAST, M.D.** received her medical degree and her Ph.D. (in pharmacology) from McGill University. She is a Clinical Professor of Psychiatry and an Associate in Pediatrics at the University of British Columbia. At the Neuropsychiatry Clinic, British Columbia's Children's Hospital, she provides assessment and treatment of children, adolescents, and adults with FASDs and other neurological disorders. She has also worked at Youth Forensic Psychiatric Services, where she provided assessment and treatment of youth, including those with FASDs who were involved in the criminal justice system. She collaborated, with Drs. Julianne Conry and Christine Loock, on the first Canadian prevalence study of youth with FASD's in the criminal justice system, and with Dr. Conry, co-authored the book *Fetal Alcohol Syndrome and the Criminal Justice System* (2000). She is the chairperson of the British Columbia Fetal Alcohol Syndrome Resource Society. **JULIANNE CONRY** received her Ph.D. in 1969 from the University of Wisconsin and retired from the University of British Columbia in 2001 after 33 years in the Department of Educational and Counseling Psychology and Special Education. She currently provides the psychological assessments as part of the multidisciplinary team evaluations for FASD at the Asante Centre for Fetal Alcohol Syndrome in Maple Ridge, British Columbia. Dr. Conry has been active in research and the clinical assessments of children, youth and adults with FASD's for over 30 years and has appeared as expert witness on FASD in the Provincial and Supreme Courts of British Columbia and the Yukon. With Drs. Diane Fast and Christine Loock, she collaborated on the first Canadian prevalence study of youth with FASD's in the criminal Justice System and, with Dr. Fast, co-authored the book, *Fetal Alcohol Syndrome and the Criminal Justice System* (2000) and also co-authored "Fetal Alcohol Spectrum Disorder: Canadian Guidelines for Diagnosis" (*CMAJ*) March 2005. **ANDREW D. WILLIAMS, M.P.H.** obtained his M.P.H. from New York University in 2009. Currently,

*he is a Prenatal Screening Project Coordinator with the North Dakota Fetal Alcohol Syndrome Center. This project aims to implement a new screening tool in North Dakota to identify women who are using alcohol early in their pregnancies. His research interests also include social determinants of health and illness, and health policy.*

**WILLIAM J. EDWARDS, J.D.** *is the special editor and a deputy public defender with the Los Angeles County Public Defenders Office. He is currently assigned to the mental health court. Mr. Edwards has authored numerous publications on the subject of people with intellectual disabilities and developmental disabilities in the criminal justice system. One of his publications was cited by the United States Supreme Court in Atkins v. Virginia, 536 U.S. 304 (2002). From 2006 to 2010, he served two terms with the President's Committee for People with Intellectual Disabilities in Washington, D. C. He also served two terms with the American Bar Association Commission on Mental and Physical Disability Law. He currently serves on the National Advisory Board for National Organization on Fetal Alcohol Syndrome. **STEPHEN GREENSPAN, PH.D.** is Emeritus Professor of Educational Psychology at the University of Connecticut and Clinical Professor of Psychiatry at the University of Colorado. His work on social competence, adaptive behavior, and gullibility has made him one of the most-cited authors in the developmental disabilities field. As a much-used expert in Atkins death penalty hearings, he submitted a widely-circulated affidavit in the Texas Hearn capital case, in which he argued for granting exemption from rigid IQ ceilings in cases involving defendants with FASD.*

**LYN ENTZEROTH, J.D.** *is a professor at the University of Tulsa College of Law, and the author of a legal textbook on capital punishment. She is a nationally recognized scholar focusing on the difficult and complicated issues involved in death penalty litigation. These issues include the philosophical debate over the death penalty, constitutional challenges to the death penalty, the modern death penalty scheme, jury selection, capital sentencing, ineffective assistance of counsel, state appeals and post-conviction, federal death penalty, and international law.*

**RICHARD I. FRIEDMAN, M.S.W., J.D.** *is Adjunct Professor of Law at New York Law School and is with the Department of the Public Advocate of the State of New Jersey.*

**DANIEL P. GREENFIELD, M.D., M.P.H., M.S.** *is a board-certified psychiatrist, preventive medicine specialist, and addiction medicine specialist. He was educated and trained in these areas at the University of North Carolina, Harvard University, and the New York Hospital-Cornell Medical Center. He has had extensive clinical and forensic experience in psychiatry and addiction medicine over the past 25 years, and has lectured,*

*testified, and published widely in these areas. Dr. Greenfield is the author of Prescription Drug Abuse and Dependence and Writing Forensic Reports: A Guide for Mental Health Professionals. He is the Book Section Editor for Journal of Psychiatry & Law.*

**PAMELA GULLY** *is an attorney with Powerlaw, PLLC, Counselors at Law in Washington D.C. She is a graduate of Washington University in St. Louis and Washington College of Law at American University. Her practice areas include disability law, employment discrimination law, elder law, and wills, trusts, and estates.*

**MICHAEL JEFFERY, J.D.** *is a Superior Court Judge, Second Judicial District in Barrow, Alaska. He has been sitting as a judge since 1982. He received his A.B. from Stanford University and his law degree from Yale. Judge Jeffery's caseload includes felony and misdemeanor criminal cases, as well as general civil litigation, probate and child welfare, child custody and juvenile delinquency cases; it brings involvement with a substantial number of persons affected by fetal alcohol spectrum disorder. He has attended numerous training events concerning FASD and served on the Alaska Statewide FAS Steering Committee. At this time, he is the Alaska Court System representative to the Alaska FASD Partnership and serves on the advisory board of the federally funded Arctic Regional FASD training Center at the University of Alaska Anchorage. He is also a member of the Alaska Juvenile Justice Advisory Committee. He has presented on FASD and the justice system issues to the Alaska Bar Association, the Alaska Court System and regional FASD conferences in Alaska and California.*

**KENNETH JONES, M.D.** *is the Chief of the Division of Dysmorphology /Teratology at the Department of Pediatrics at UCSD and Medical Director of the CTIS Pregnancy Risk Information Line. His research has focused on the clinical delineation of birth defects, mechanisms of normal and abnormal morphogenesis, and the recognition of new human teratogens. The work on recognition of new human teratogens is primarily focused through CTIS Pregnancy Risk Information, a service which he established in 1979 and which is funded by the State of California. Dr. Jones has authored over 400 publications in scientific journals as well as several books and he is the author of Smith's Recognizable Patterns of Human Malformation. He is considered to be the father of Fetal Alcohol Syndrome (FAS) as he was one of 2 doctors at the University of Washington who first identified FAS in the United States in 1973. Over the past 37 years he has continued to make significant contributions to our understanding of the prenatal effects of alcohol, most recently as the head of the Dysmorphology Core of the larger NIAAA consortium studying this disorder. ANN STREISSGUTH, PH.D. is a developmental and clinical psychologist, from the University of California at Berkeley and the University of Washington in Seattle. She taught in the*

*Department of Psychiatry and Behavioral Science and the Division of Child Psychiatry beginning in 1964 until her retirement in 2005. She has published over 130 articles in refereed journals; over 60 book chapters and other assorted papers; and with Ruth Little, a slide-teaching program for FAS. With Dr. Robin LaDue, she wrote "A Manual on Adolescents and Adults with FAS with Special Reference to American Indians" and with colleagues at the U.W. Fetal Alcohol & Drug Unit, she wrote "Understanding the Occurrence of Secondary Disabilities in Clients with FAS and FAE." She published two books on FAS in 1997: Fetal Alcohol Syndrome: A Guide for Families and Communities and The Challenge of Fetal Alcohol Syndrome: Overcoming Secondary Disabilities.*

**AMY MACKIN** is a health care regulatory attorney at K&L Gates LLP in Research Triangle Park, North Carolina. She is a graduate of Harvard University and the University of North Carolina School of Law.

**BLAIR PALEY, PH.D.** is an Associate Clinical Professor in the Department of Psychiatry and Biobehavioral Sciences at the Semel Institute for Neuroscience and Human Behavior at the David Geffen School of Medicine at UCLA. Dr. Paley is the Principal Investigator and Director of the SEEDS (Strategies for Enhancing Early Developmental Success) Program for Young Children with Prenatal Alcohol Exposure at UCLA. She has previously served as an investigator and co-investigator on several federally funded grants aimed at developing and evaluating evidence-based interventions for children with Fetal Alcohol Spectrum Disorders (FASD) and designing FASD curricula for medical school students and faculty. Dr. Paley is one of the founding members of the Western Regional Training Center for Fetal Alcohol Spectrum Disorders, which was created to reduce the incidence of alcohol-exposed pregnancies and to increase the availability and quality of services for individuals affected by FASD and their families through improved education and training of medical and other health students and professionals. **BARBARA E. AUERBACH, J.D.** is a retired attorney serving as a board member of the Area I Board for Developmental Disabilities in Northern California. She was a supervising attorney in the Los Angeles County Children's Court, and she specializes in issues relating to children and families in Family law, Dependency, Delinquency, Criminal, Probate, Civil and Adoption Courts. She has extensive knowledge of FASD and has trained judges, attorneys, parents, social workers, foster parents and others to recognize the effects of FASD and negotiate for treatment.

**BRYAN STUART, PSY.D.** practices clinical and forensic psychology in New York.
